Sample Home Energy Audit

<u>Attic</u>

Insulation - Is there enough insulation between ceiling joists?

Vents - Sufficient and unobstructed?

Living Areas

| Air Leakage - Tape a foot of toilet paper to a pencil with paper hanging free. Hold near windows and doorframes, window air-conditioning units, and electrical covers. If paper moves, you may need weather-stripping, caulking, or storm windows. |
|--|
| Wall Insulation - Are the wall too cool to the touch on a cold day or too warm on a hot day? |
| Thermostat - Set at 68 degrees in winter (turn down 5 degrees more when sleeping), 78 in summer. |
| Drapes - During winter, open drapes and shades to let sunlight in. Close at night. During the summer, close drapes. |
| Unused Rooms - Close heating and cooling vents, doors in areas seldom used. |
| Use fans instead of air conditioning when possible. Fans can also help circulate air when the air conditioning is on. |

Fireplace

- Close the damper when fireplace is not in use.
- Glass doors keep heat from escaping up the chimney.

<u>Kitchen</u>

- Refrigerator/Oven Seal To test, close a dollar bill in the door. If the bill moves with little resistance, the seal is bad.
- Appliances Use washers and dryers in the morning and late evening hours when energy requirements are lower.
- Lights Turn off lights when not used. Install lower wattage and fluorescent light bulbs whenever possible.
- Faucets do not drip.

Basement/Crawl Space

- Heating/Cooling System Clean or replace filters monthly. Have unit serviced once a year.
- Water Heater Set temperatures no higher than 120 degrees. Drain sediments 3-4 times a year.
- Ducts/Pipes Insulate hot water pipes as well as heating and cooling ducts.
- Floors If you have a crawl space under your house, install batt-type fiberglass insulation under floors.
- Venting Washer & dryer units should be vented directly to the outside.

<u>Outside</u>

- Weather Stripping & Caulking Caulk the cracks around windows, weather-strip around doors.
- Windows Storm windows and double-paned glass can reduce energy usage up to 15%.
- Doors Keep doors tightly closed on hot or cold days.
- Storm Doors Help insulate doors
